The US active rig count has increased by 11% YTD as the Permian Basin count has increased by 55 rigs this year, according to RigData News & Analysis' Biweekly Report. In the latest issue, the Permian Basin saw increases in active count by 7 rigs, its marketed tally by 4 rigs, and its float count by 6 rigs. As the float count increased by 6 rigs to 34—3 rigs above the 2014 average—the count of Permian available rigs (the difference between marketed and the sum of active and float) fell below 100 for the first time since June 2012, to 92. For the year, the 500–999 hp and 1,500–1,999 hp classes have made up the 55-rig net gain in the region. The 1,500–1,999 hp class has picked up 30 rigs YTD but has had no change in available rigs, since most of the rigs are newbuilds put straight to work or have moved from another region. The 500–999 hp class has had a gain of 25 rigs YTD, which has decreased the Permian available rigs in the class by the same amount.

Call 800-627-9785 to subscribe to RigData's Biweekly Report, the leading statistical monitor of overall land rig market activity.
